National Road Rage Survey Ranks Miami the Least Courteous City in the U.S. for Third Consecutive Year

Norwalk, Conn. – May 13, 2008 – The commute to work can be an unpleasant one for people across the country, and the road seems to be even bumpier for Miami drivers.

The third annual **In The Driver’s Seat Road Rage Survey**, commissioned by AutoVantage, a leading national auto club, found that **Miami is the least courteous city** in the country for the third consecutive year in terms of road rage, compared to 24 other major American markets.

Miami drivers ranked No. 1 for the second consecutive year for seeing other drivers running red lights every day. Drivers in Miami are also most likely to observe other drivers cutting into their lane with little or no warning and speeding on a daily basis. In addition, Miami drivers tied for the No. 2 spot with Houston and Detroit for texting, emailing and/or using a BlackBerry while driving every day.

For the third consecutive year, Miami ranked as the worst city for road rage, while the most courteous city is Pittsburgh. New trends and road rage triggers for 2008: drivers talking on cell phones, eating, drinking, texting and e-mailing.

The **In The Driver’s Seat 2008 AutoVantage Road Rage Survey**, released today, was conducted to determine the driving habits and attitudes of commuters across the U.S. and to learn more about consumer views on the topic of road rage.

“Unfortunately, road rage is too often a way of life,” said Brad Eggleston, vice president of AutoVantage. “More and more, in cities across America, people are acting out their frustrations with dangerous results. And with a gridlocked, fast-paced, multi-tasking society, the trend continues to increase.

“There are some very interesting results in this year’s Road Rage survey, which shines the light on emerging driving trends.”

The survey’s best and worst cities are:

Least Courteous Cities (Worst Road Rage):

- | | |
|--------------------|---------------------|
| 2008 | 2007 |
| 1. Miami | 1. Miami |
| 2. Boston | 2. New York |
| 3. New York | 3. Boston |
| 4. Baltimore | 4. Los Angeles |
| 5. Washington, D.C | 5. Washington, D.C. |

(MORE)

Most Courteous Cities (Least Road Rage):

2008

1. Pittsburgh
2. Portland, Ore.
3. Seattle
4. Minneapolis
5. Cleveland

2007

1. Portland, Ore.
2. Pittsburgh
3. Seattle
4. St. Louis
5. Dallas/Ft. Worth

Other cities surveyed include Los Angeles, Chicago, Dallas, Philadelphia, Houston, Atlanta, Detroit, San Francisco, Phoenix, San Diego, St. Louis, Tampa, Denver, Cincinnati, and Sacramento, Calif.

Want to know how you rate? Check your road rage temperature by taking our online survey at www.gaugemyrage.com.

This new study focuses on important attitudes and habits of drivers on the open road nationwide and offers groundbreaking research and important trends to help educate and influence safer driving habits throughout the United States.

Capt. Mark Welch, chief of public affairs for the Florida Highway Patrol, witnesses the dangers of road rage firsthand, and his agency has developed a comprehensive program to keep the highways safe. "When drivers let their emotions get the best of them, they take it out on other drivers, putting everyone on the road in danger." The Florida Highway Patrol is on the lookout for road rage behaviors, and stepped-up measures include troopers in unmarked vehicles that track aggressive drivers, as well as aircraft and motorcycle units that patrol the skies and roadways for road rage.

To boost safety awareness, this year's survey sought to **define road rage in America**. Two important attributes emerged in defining **road rage behavior**:

- **Angry or upset drivers**, including out-of-control drivers and drivers who lose their tempers.
- **Bad or aggressive driving**, including bad/careless/crazy and/or rude driving, cutting into lanes, cutting people off, tailgating, speeding and/or honking.

When asked the major causes of road rage in the survey, the most frequent theme was people being in a hurry, running late, being impatient and/or speeding. Direct quotes from the survey are:

- "Bad/careless/poor driving, such as cutting others off, speeding, making obscene gestures and not using proper signals"
- "People who are angry, stressed, frustrated, had a bad day/temper or are tired"
- "People being in a hurry, impatient or running late"
- "Inconsiderate, disrespectful, selfish drivers who think they own the road"

Behaviors by other drivers that cause stress for commuters and can lead to road rage, include:

- Drivers who talk on their cell phones (88 percent observe this happening every day)
- Driving too fast (59 percent)
- Tailgating (56 percent)
- Drivers eating or drinking while driving (49 percent)

Commuters also reported other drivers frequently:

- Cutting over without notice (44 percent see this every day)

(MORE)

- Texting, e-mailing or using BlackBerry while driving (38 percent)
- Doing other things – putting on makeup, shaving or reading behind the wheel (29 percent)
- Slamming on the brakes (28 percent)
- Running red lights (26 percent)

As a reaction to rude or bad driving by others, people surveyed admitted that they:

- Honk their horn at the offending driver (43 percent)
- Curse at the other driver (36 percent)
- Wave their fist or arms (11 percent)
- Make an obscene gesture (9 percent)
- Call the police to report the driver (8 percent)
- Slam into the car in front of them (1 percent)

Drivers also weighed in on how to reduce rude driving and road rage:

- Limit cell phone usage to “hands free” only (59 percent)
- Make it illegal to use cell phones while driving (52 percent)
- Use automatic cameras to catch bad drivers (56 percent)

Other key findings of the study:

- **Younger drivers** and those who have the **longest commutes** are most likely to react to an aggressive or rude driver. Younger drivers are more likely to honk their horns, while those with the longest commutes are more likely to make an obscene gesture.
- There is **no real difference** between men and women when it comes to road rage.
- Commuters see such **road rage inducing behaviors** as **talking on the cell phone** (88 percent), **driving too fast** (59 percent), and **tailgating** (56 percent) every day.
- **Talking on cell phone.** Eighty-eight percent see this every day. New York drivers led this category (70 percent), and Pittsburgh motorists see it the least (39 percent).
- **Driving too fast.** Across the country, 59 percent see this aggressive behavior daily. Atlanta and Miami drivers have the biggest lead feet (73 percent), while Cincinnati drivers were least likely to see this every day (46 percent).
- **Tailgating.** Fifty-six percent of motorists see this every day. New Yorkers (70 percent) see this most often, and Pittsburgh drivers (39 percent) see this least.
- **Cutting over without notice.** Nationally, 44 percent of drivers see this every day, and motorists in Miami (66 percent) were the most likely to observe this behavior daily. Pittsburgh drivers (28 percent) are least likely to see this daily.
- **Eating and/or drinking,** a common road rage trigger, is observed by 49 percent of drivers daily. Motorists in Baltimore, New York and Tampa (57 percent) see this daily, while only 36 percent of drivers in Pittsburgh witness this daily.
- **Texting and/or e-mailing,** and other road rage inducers, scored high with 38 percent of commuters observing this behavior every day. Drivers in Denver, Houston, Miami, and Phoenix see the most text-happy drivers (46 percent), while it’s sleepless in Seattle, with only 25 percent of commuters report seeing daily texting and e-mailing.
- **Slamming on the brakes.** Some 28 percent of drivers witness this daily, and those in Washington, D.C. (40 percent) are most likely to see this behavior daily. Drivers in Pittsburgh are least likely (19 percent) to witness this daily.
- **Running red lights.** More than one-fourth (26 percent) said they see drivers every day who run red lights. Drivers in Miami and Tampa are the most likely to witness this behavior (47 percent) daily, while Pittsburgh motorists (13 percent) were least likely to see this every day.

(MORE)

Overall, nearly a third, or 29 percent, said they see **drivers multi-tasking like putting on makeup, shaving or reading** while driving. Tampa (40 percent) emerged as the city where this is most likely to be seen, while Cincinnati (20 percent) was the least likely place for the behaviors.

AutoVantage 20th Anniversary Great Gas Giveaway

AutoVantage is celebrating its 20th Anniversary this year with a Great Gas Giveaway sweepstakes and a grand prize of 20 years' worth of free gas. To participate in the sweepstakes, visit www.autovantage.com.

Survey Methodology

Prince Market Research, an independent marketing research company, was commissioned to conduct a nationally representative telephone study with consumers in 25 major metropolitan areas in the U.S. to learn more about consumer views on road rage. All telephone calls were conducted between Feb. 4 and March 23, 2008, during which period, a total of 2,512 interviews, lasting an average of six to eight minutes, were completed. No incentive was offered and the sponsor of the research was not revealed. The margin of error is +/- 2 percent.

About AutoVantage

Members of AutoVantage (<http://www.autovantage.com> or 1-800-876-7787) can save from 5 to 20 percent on car care at some 19,000 service locations, including participating AAMCO, Jiffy Lube, Meineke and American Car Care Center locations. AutoVantage also offers 24-hour nationwide emergency towing, roadside assistance, and lockout protection from its network of more than 10,000 emergency roadside assistance providers. Trip routing for maps and door-to-door driving directions across the U.S. are also included. AutoVantage is offered by Affinion Group, a leader in the membership, insurance and loyalty marketing businesses, providing products and services that touch the lives of millions of Americans.

About Affinion Group

As a global leader with nearly 35 years of experience, Affinion Group (www.affinion.com) enhances the value of its partners' customer relationships by developing and marketing valuable loyalty, membership, checking account, insurance and other compelling products and services. Leveraging its expertise in product development and targeted marketing, Affinion helps generate significant incremental revenue for more than 5,300 affinity partners worldwide, including many of the largest and most respected companies in financial services, retail, travel, and Internet commerce. Based in Norwalk, Conn., the company has approximately 3,300 employees throughout the United States and in 10 countries across Europe. Affinion holds the prestigious ISO 27001 certification for the highest information security practices, is PCI compliant and Cybertrust certified.
